

MICROVASCULAR NEUROPATHY CARE

"I was suffering with neuropathy for several years, with little relief from medication. The Microvas treatments have lessened the burning in my feet that would keep me up all night and my balance has noticeably improved when walking and using stairs."

– Cathy C.

"Your neuropathy program with all the massage and rehabilitation have helped me tremendously. Not only do I feel terrific every time I leave your office, but I know I'm making real progress from week to week."

– Jeff R.

DO YOU SUFFER FROM PERIPHERAL NEUROPATHY?

Peripheral Neuropathy is a nerve disorder known to affect millions of people throughout the U.S. It is a complication found in several different medical conditions including Diabetes, Peripheral Vascular Disease, Post Chemo-Radiation therapies and Metabolic disorders being some of the most common.

WHAT IS MICROVAS?

MicroVas is a FDA cleared, non-invasive vascular treatment system that delivers electromagnetic energy to targeted areas of the body. After years of research, this technology was originally developed to treat Navy SEAL divers for hypothermia. It has since been engineered as a groundbreaking innovation with the ability to address the root cause of neuropathy, often a lack of nerve fiber circulation in the injured area.

MicroVas' powerful, deeply penetrating waveform causes blood to pump and circulate much more efficiently by significantly raising tissue oxygen levels, resulting in a potent effect on the microcirculation. Studies have demonstrated marked increases in tissue oxygen supply within minutes of initiating treatment. In contrast to other technologies available, this process results in new capillary formation, laying the groundwork for new tissue growth and repair while accelerating the healing process.

In our experience, MicroVas' therapeutic effects are often substantial and our unique approach of implementation, including extensive manual hands-on therapy and functional conditioning is designed to help you achieve optimal results for long-term relief.

"The Rehability team did more hands on work than I have ever seen at any other facility. We saw a big improvement not only in leg strength, but most important in my balance. Thank you for working so hard to help me get back to doing yard work and projects around the house."

– Joe Z.

"Expressing thanks for all the help and improvement I received from your wonderful staff. The Microvas treatments and therapy team were great and gave me the confidence that I could walk again. Thank you all."

– Ingrid S.

"We Personally Invite You To Schedule A Comprehensive Evaluation To Determine If You Are A Microvas Candidate and To Learn More About Our Exclusive Neuropathy Program." - The REHABILITY Team...We Can Help!
